

Team5 Technologies Pvt. Ltd.

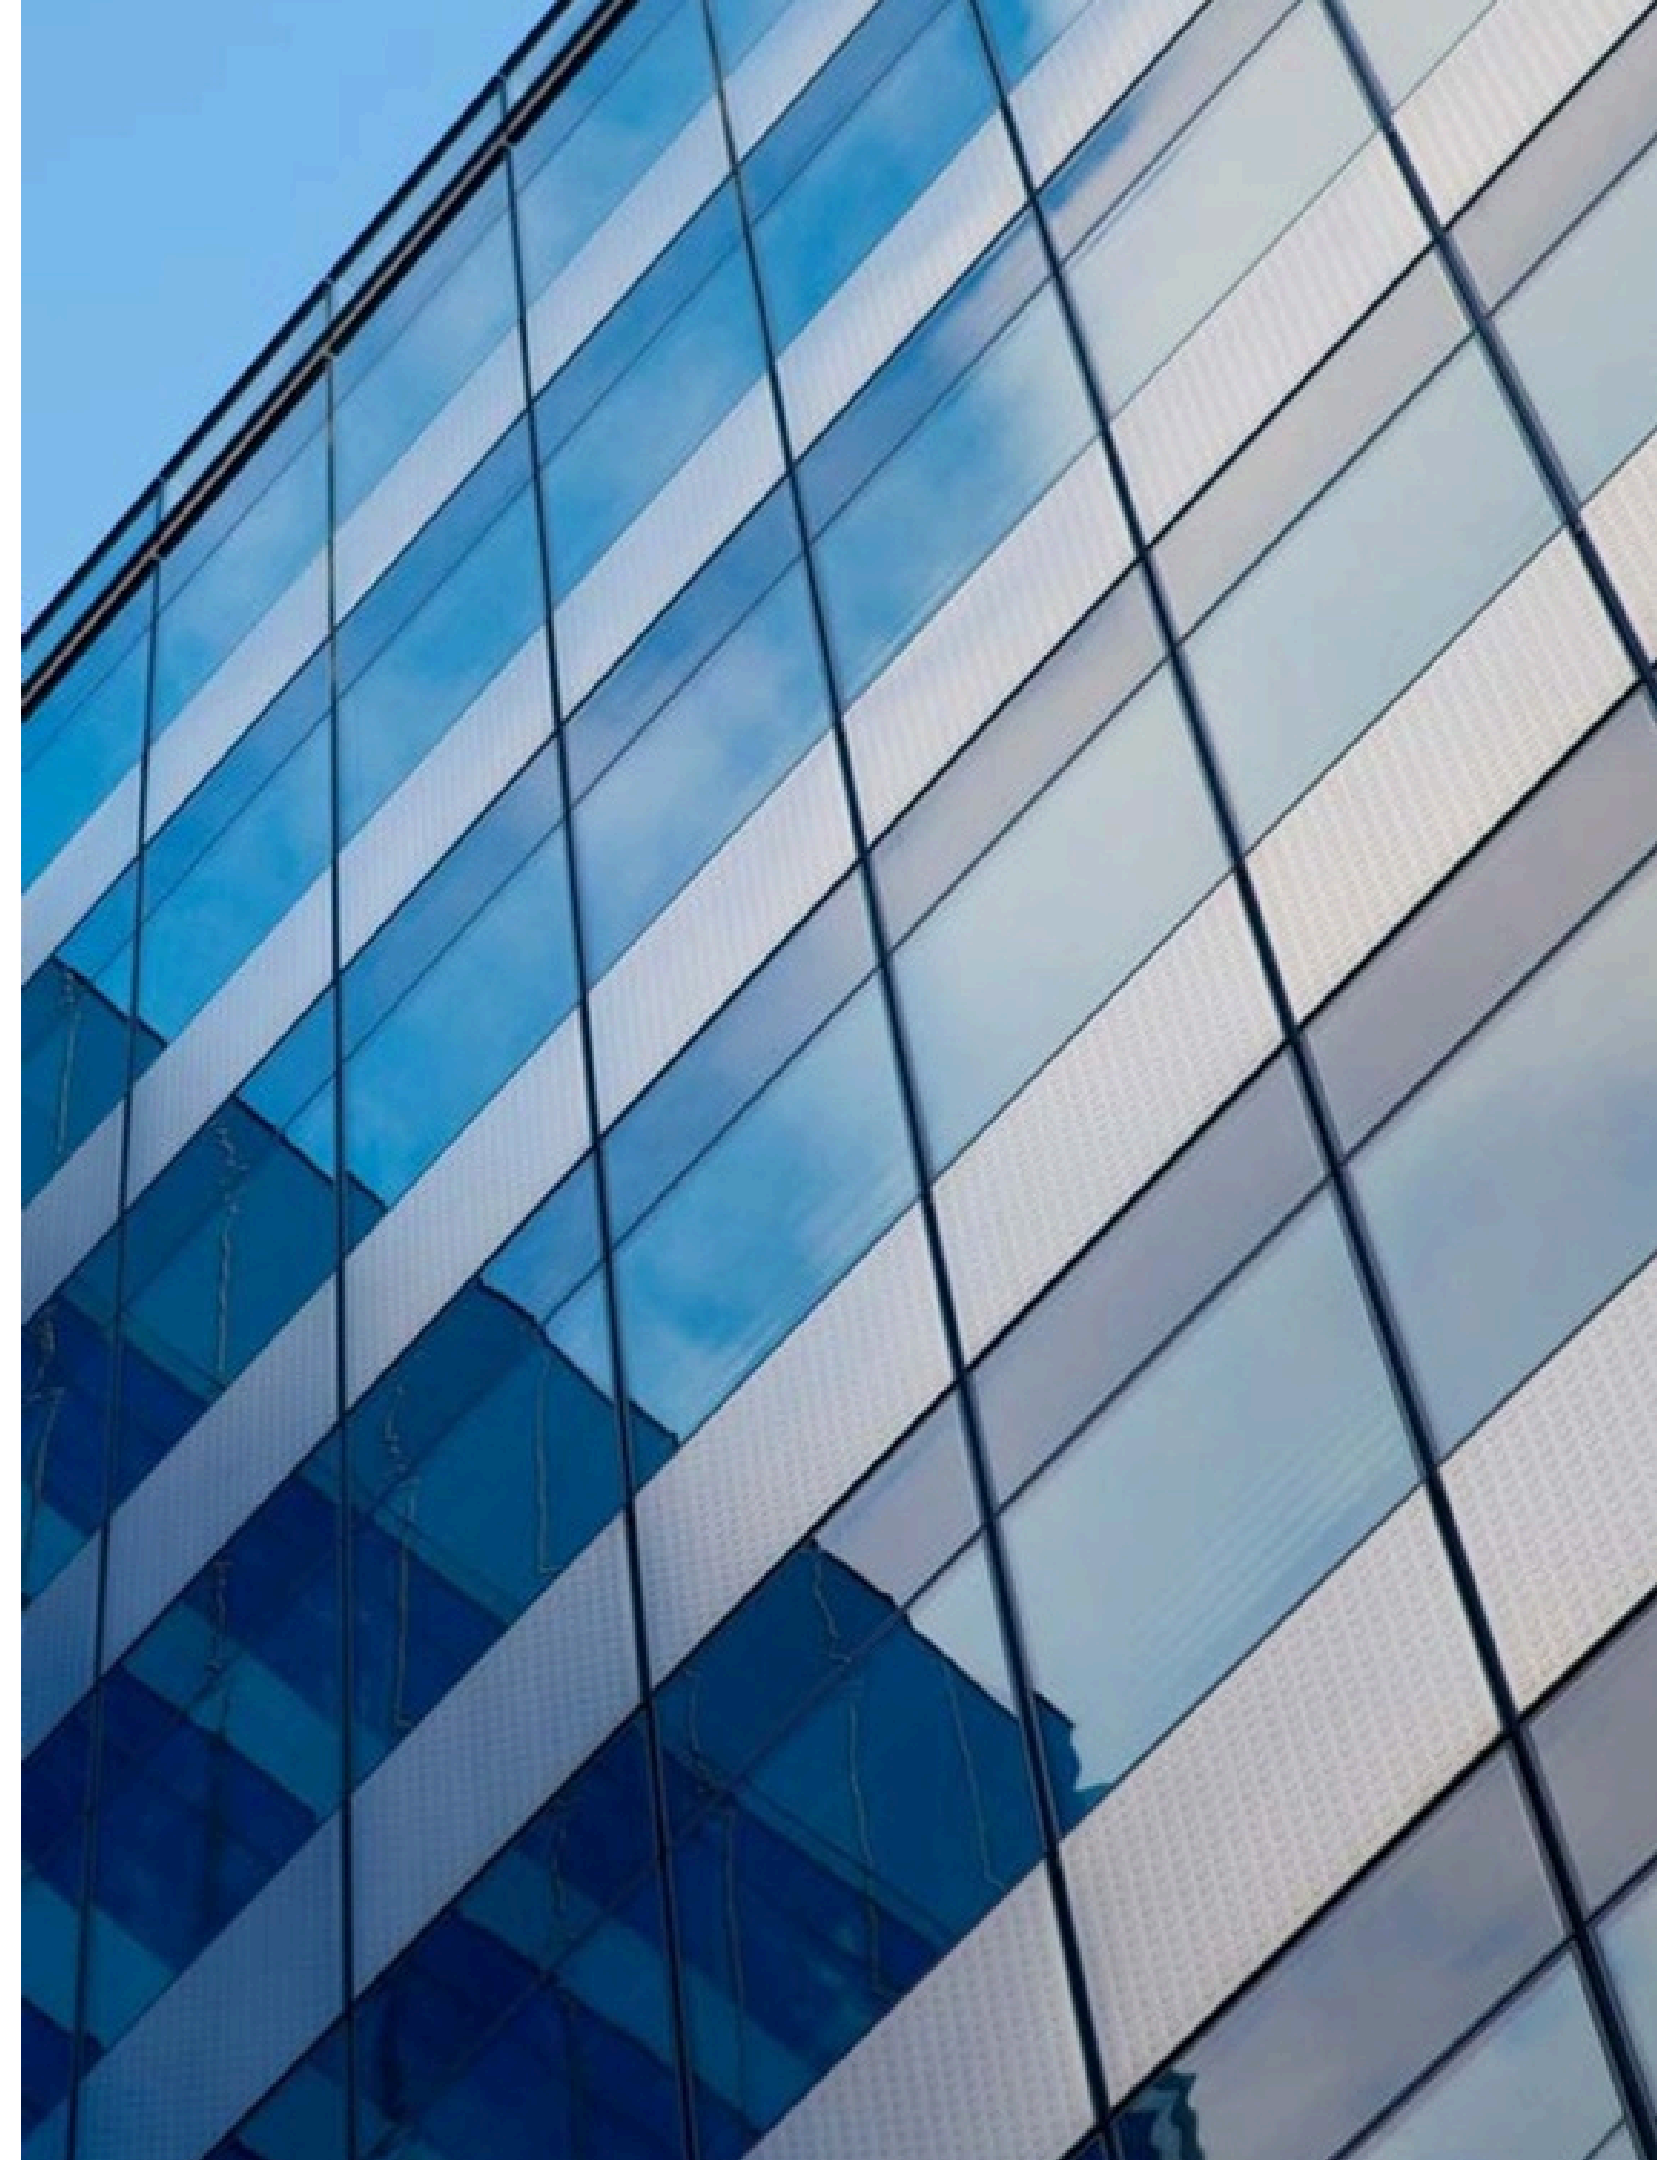

Corporate Profile

About Team5

Team5 Technologies : Empowering Businesses with Innovative Technology Solutions & AI.

Team5 Technologies is a trusted technology solutions provider delivering advanced networking, connectivity, testing, and IT infrastructure solutions to enterprises across industries. We help organizations build reliable, scalable, and future-ready technology environments with a strong focus on quality, performance, and customer satisfaction.

We are dedicated to Enabling AI Digital Transformation for next-generation businesses. We empower enterprises to modernize their operations, harness the power of proprietary data, and achieve exponential growth by placing Artificial Intelligence at the core of their strategy.

Company Goals

Building Technology Partnerships through Opportunities, Trust & long-term Commitment.

Our Mission

To be the trusted strategic partner for enterprises worldwide, enabling AI Digital Transformation by delivering cutting-edge, scalable AI Factory Solutions that unlock unprecedented operational efficiency, accelerate decision-making, and create new pathways for sustained competitive advantage.

Our Vision

Our Vision: To redefine the global business landscape by leading the revolution in intelligence, becoming the definitive force in enabling AI Digital Transformation for every industry. We aim to see a world where every enterprise operates as a self-optimizing, AI-powered factory, driven by the innovative solutions of Team5 Technologies.

AMD GPU SERVERS BUILT FOR AI, HPC & HIGH PERFORMANCE WORKLOADS

AMD GPU AI SERVERS

G8826Z5 (8U)

8x AMD Instinct™ M1300X

AI Training ● HPC • LLM

- 8U Rackmount
- 8x AMD Instinct™ MI300X GPUs
- 4th Gen AMD EPYC™ Processors
- Up to 4TB DDR5 Memory

G4826Z5 (4U)

8x AMD Instinct™ M1300X

High Performance AI

- 4U Rackmount
- 8x AMD Instinct™ MI300X GPUs
- 4th Gen AMD EPYC™ Processors
- Up to 3TB DDR5 Memory
- Up to 4TB DDR5 Memory

G2726Z5 (2U)

4x AMD Instinct™ M1300X

Balanced Performance

- 2U Rackmount
- 4x AMD Instinct™ MI300X GPUs
- 4th Gen AMD EPYC™ Processors
- Up to 2TB DDR5 Memory

G4526 (4U)

8x AMD Instinct™ MI250X/M1250

HPC AI Analytics

- 4U Rackmount
- 8x AMD Instinct™ MI250X/M1250 GPUs
- 3rd Gen AMD EPYC™ Processors
- Up to 2TB DDR4 Memory

G2725 (2U)

4x AMD Instinct™ M1250X/M1250

Deep Learning • Inference

- 2U Rackmount
- 4x AMD Instinct™ MI250X/M1250 GPUs
- 3rd Gen AMD EPYC™ Processors
- Up to 1.5TB DDR4 Memory

Advance Partner

F5 PRODUCT PORTFOLIO

F5 rSeries and VELOS deliver FPGA-accelerated, API-driven application delivery with top-tier SSL performance.

A SaaS-based platform that unifies security, networking, and application management across multi-cloud, data center, and edge environments

F5 NGINX provides fast, lightweight, and scalable application delivery and management for modern, cloud-native applications.

Advance Partner

FORTINET NETWORKING SOLUTION

FORTINET NETWORK SWITCHES

- High performance and scalability
- Secure Access and segmentation
- Simplified operations and automation
- Optimised for Data Center and Enterprise

FortiSwitch Series

FORTINET NETWORK SWITCHES

- High performance and scalability
- Secure Access and segmentation
- Simplified operations and automation
- Optimised for Data Center and Enterprise

FortiGate Series

FORTINET NETWORK SWITCHES

- High performance and scalability
- Secure Access and segmentation
- Simplified operations and automation
- Optimised for Data Center and Enterprise

FortiAP Series

FORTINET SECURITY SOLUTIONS

FortiGate Next-Generation Firewalls (NGFW)

Industry-leading threat protection, application control, and secure connectivity.

FortiADC

(Application Delivery Controller)
High availability, load balancing and acceleration for modern applications.

FortiWeb

(Web Application Firewall)
Protect web applications and APIs from OWASP Top 10 and advanced web attacks.

FortiAnalyzer (Analytics & Logging)

Centralized logging, analysis and reporting for security and compliance.

FortiClient (Endpoint Security)

Endpoint protection with EPP, EDR, vulnerability management and zero-trust access.

FortiNAC

(Network Access Control)
Ensure only trusted users and devices access your network with visibility and control.

Infrastructure

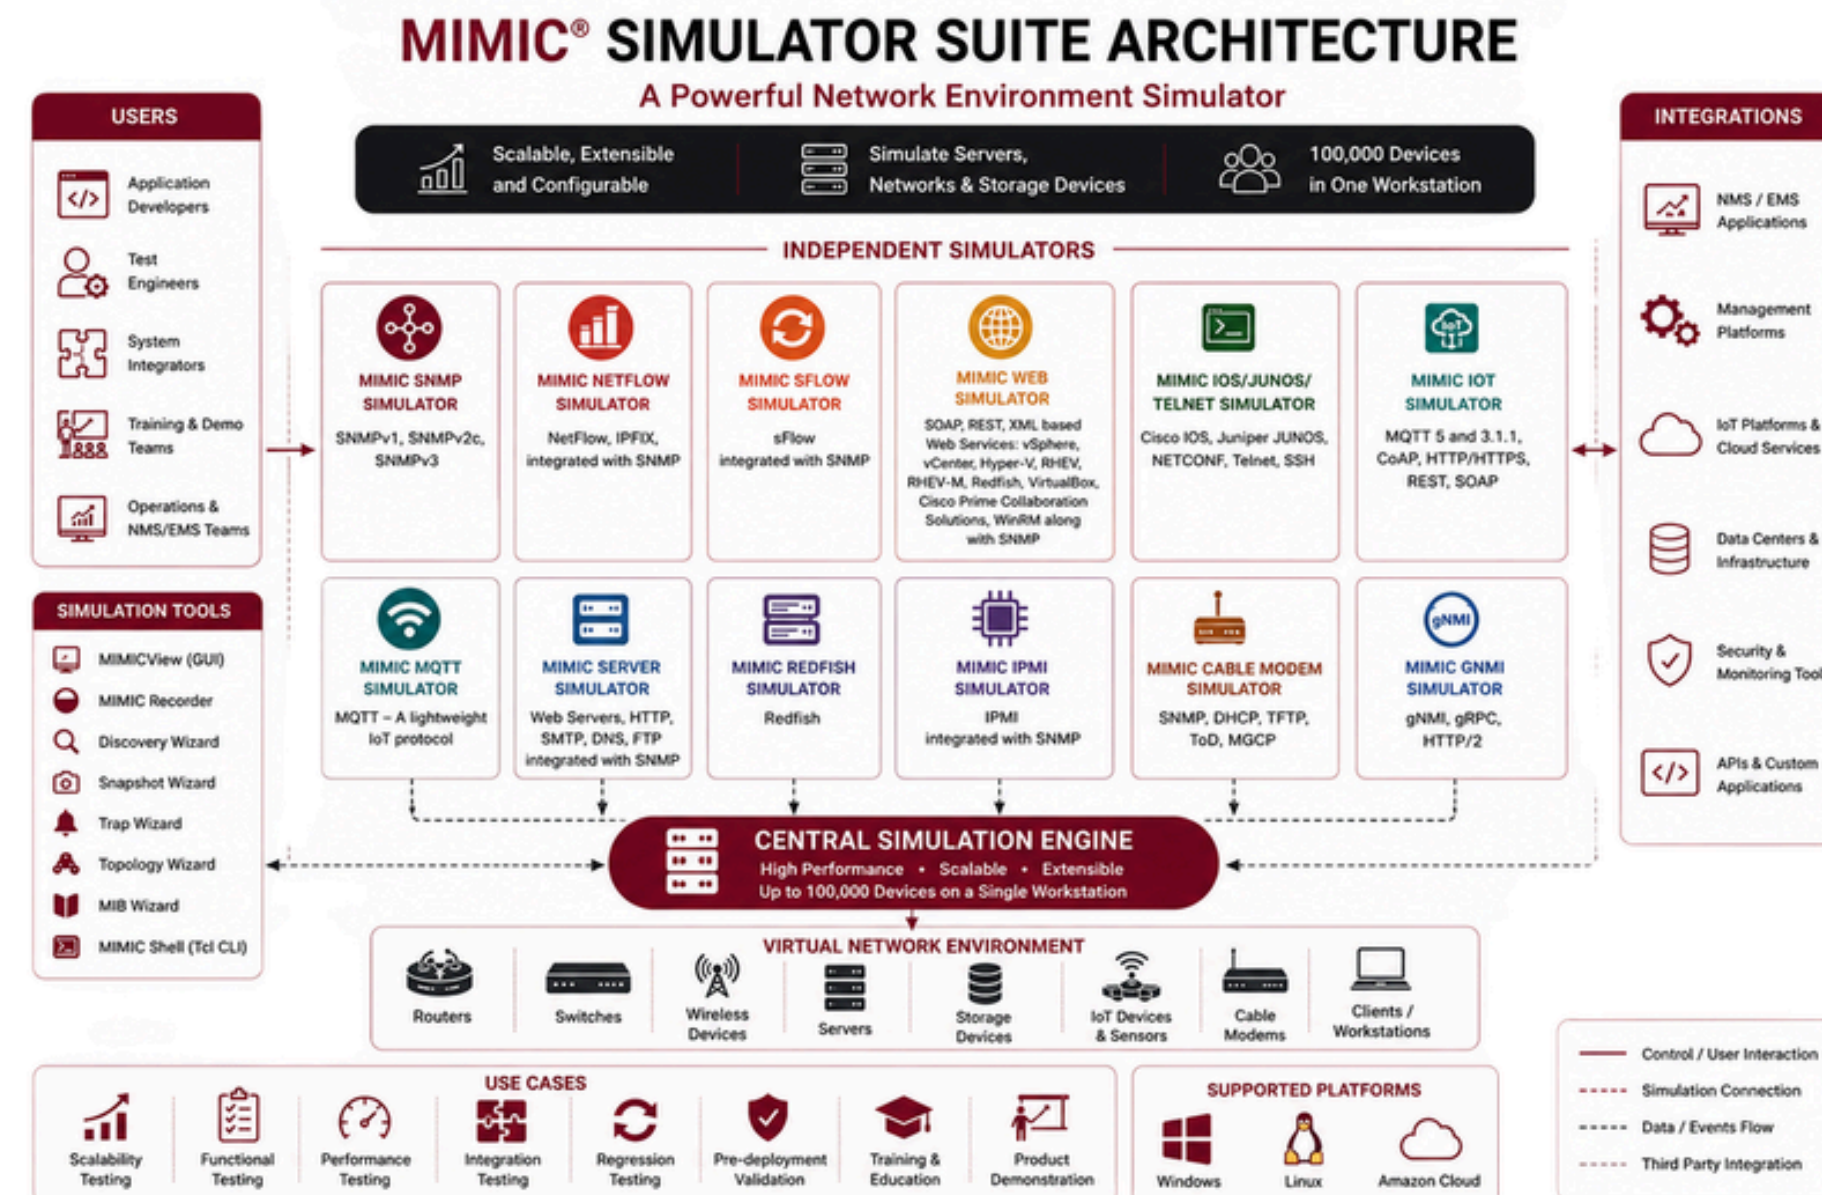

MIMIC® gNMI Simulator

Simulates the OpenConfig gNMI specification over gRPC/HTTP-2. Supports CAPABILITIES, GET, and SUBSCRIBE RPCs. Imports OpenConfig and custom YANG models. Generates predictable, dynamic, and repeatable telemetry streams. Ideal for validating next-generat.

MIMIC® SNMP Simulator

Simulates up to 100,000 SNMP-manageable devices Full support for SNMP v1, v2c, v3 and SYSLOG Imports public and private MIBs Generates large-scale trap storms and failure scenarios Accurately emulates real device behavior for NMS and OSS platforms
